

There's *Hope* in our Walk!

Parkinson's disease affects over 100,000 Canadians. Ask any one of these individuals and they'll tell you that everything is harder when your body turns against you. This September, *hope* will drive over 12,000 individuals to participate in 1 of 80 SuperWalks across Canada. We *hope* that you too will walk. To register as an individual or as a team, or to make a donation please visit superwalk.com

Ryan and Derek *hope* to raise \$5,000 for Parkinson research by collecting bottles this summer, so their "Papa Jim's" hand won't shake any more.

Dr. Ivar Mendez (on the screen) *hopes* that his robot will allow him to treat people like Howard Bonnell with Parkinson's in remote places.

James Smerdon, diagnosed with Parkinson's last year at 33, *hopes* that people understand that Parkinson's does not discriminate by age.
